India is recognized in the world by its IT expertise. It makes the country a very special market for international partnership in IPTV/OTT business as well.

We are happy that Telebreeze already has realized projects in India in previous years and continues to stay with Indian enterprises for now and for the long term.

Telebreeze OTT/IPTV Solution is a software-defined platform, designed for the preparation, management and delivery of media content across multiple video platforms.

Our solutions work in MSOs, ISPs, telcos, content aggregators, studios, event and, social entities.

Here is a basic list of business tasks that we solve:

- ❖ Implementing IPTV/OTT for MSOs and ISPs.
- ❖ Migrating Cable Operator to IPTV/OTT
- ❖ Launching a Digital Cinema (AVOD/SVOD Platform)
- ❖ Starting Cloud Video Service
- ❖ Launching OTT with Multi-Brand Operators

Telebreeze OTT/IPTV Platform is designed for organizing a media business at different stages of its development: build it from scratch, make an add-on to an existing service provider network, develop a network of service providers under your brand.

Telebreeze products: Middleware, Transcoding, Streaming, VOD, OTT Apps, Multiplatform video player, Monetization and security tools - comprehensively cover the IPTV and OTT distribution pipeline.

All software components of the solution are in-house developed. This guarantees the best interoperability between software modules and maximum efficiency of the entire IPTV/OTT network.

Telebreeze has been recognized by the global telecom business since 2012. More than 190 customers from 74 countries trust the Telebreeze solution.

And Telebreeze trusts its customers, getting involved to each project individually.
