### E01: VORTEX NETSOL PVT. LTD.

We belong to the VORTEX group of companies whose interests and services include Fiber Broadband, ILL, FTTX, Multi-Play Services, Cable TV and allied Information, Communication and Entertainment Technology Sector Services & Solutions.

URL: [www.vortexnetsol.com](http://www.vortexnetsol.com)

### E02: PPC BROADBAND INDIA PVT. LTD.

Today's global broadband market features ever-changing technologies and vast differences in regional architectures. The Asia Pacific differs from Europe, which differs from the Americas, which in turn demand different components than Africa and the Middle East. To serve each region – to be a true worldwide partner to the industry's largest network operators and service providers – a company must amass an incredibly broad product portfolio and suite of services to support each geographic market.

PPC Broadband is one of those rare global solutions providers able to support customers and network demands in all of the world's localities.

Across nine decades, PPC has established itself as the premier innovator within the communications space. As an early pioneer of connectors used in CATV and digital cable systems, PPC holds more patents

in connector technology than any other company in the world. And over the last decade, PPC has become a major provider of fiber and optical network components to the biggest telecommunications companies around the globe. Through its advanced fiber test laboratory and strategic growth initiatives, PPC has rapidly expanded its product breadth – today offering comprehensive solutions for Central Office, Outside Plant, and Premises applications for network architectures of all types.

URL: [www.ppc-online.com](http://www.ppc-online.com)

### E03: ANTRIKSH DIGITAL SOLUTION LLP/GOSPELL

The hardware and platforms are part of the Antriksh Digital and the software services are part of Vyomsai Technologies. As a group, we offer end to end solutions for Cable TV and FTTH Broadband and are among the few companies offering a convergence solution for cable and broadband to fit the needs of Triple Play Services.

M/S Antriksh Digital Solution LLP. Incorporated in the Year 2016, helps customers build their network delivering an All-IP solution for their bandwidth needs. The tie ups include Gospell, PPC (A Belden Brand), Triax, IP Infusion which are all top-of-the-line companies in the respective region of solutions.

With Gospell we provide digital headend and set top boxes. Under PPC we have the broadband products from the data center Cables to the home Wi-Fi onto including the fiber optic distribution edfa, patch panels, etc. With IP Infusion we bring to the table

the transport and MPLS routing portfolio including the core, data aggregation and DWDM transport. We are exclusive partners for Triax range of splitters.

Under Vyomsai Technologies we have StrataGEM BSS/OSS solution. With StrataGEM, we provide a tailored solution to the software needs and the choice to choose from the various features which is required for ISP's network and opt out of the vestiges which come as a bundled solution.

STRATAGEM provides an ISP focussed IP Based Solutions that will enable ISPs and their Supply Chain (distributors, retailers etc) to easily drive their business that include Broadband Management, Wi-Fi Management, Lease line Management, Triple Play Solutions, IPTV & Cable Billing Solutions. Deployed as a single stack platform, it helps optimize operating costs and support for innovative offerings and customer experience.

Our assemblage of solutions include varied deployments for Device Authentications in the international markets. Being a technology enabler, our OSS/BSS services are also cloud ready.

URL: [www.antrikshdigital.com](http://www.antrikshdigital.com)

### E04: UNIWAY INFOCOM

UNIWAY INFOCOM is in the business of Cable TV, ISP and Telecom solutions.

We provide the widest range of products for CATV, GEON and other networking solutions along with all accessories related to Optical Fiber Networks.

Our commitment is to continue to build on our past success with innovation along with the most competitive prices. We are committed to provide products of highest quality

adhering to global standards and excellent after sales support.

Our aspiration is to make a positive impact in our customers lives while establishing long-term relationships and loyalty.

Unlike most companies which respond to their customers through autobots, voice mail or other complicated corporate policies, neglecting human interaction, we at UNIWAY answer your calls directly and a friendly sales representative gives you their utmost attention for all your networking needs.

We also provide qualified and well experienced engineers for design consultation and product information.

We embrace the philosophy of “Converging Paths to Innovation” whereby we converge different paths i.e. technology to provide a one way, simple solution for our esteemed customers.

With a fully equipped Support and Repair Center we guarantee the utmost attention to detail when it comes to carrying out repairs and service for your product

URL: [www.uniwayinfo.com](http://www.uniwayinfo.com)

### E05: UBIQCOM INDIA PRIVATE LIMITED

### F02-A: ANTRIKSH DIGITAL SOLUTION LLP/ IP INFUSION/ UFISPACE

Antriksh is part of the AV Group of companies. The hardware and platforms are part of the Antriksh Digital Solution LLP. And the software services are part of Vyomsai Technologies Pvt. Ltd. As a group, we offer end to end solutions for Cable TV and FTTH Broadband and are among the few companies offering a convergence solution on OTT platform also to fit the new age needs of Triple Play Services at the figure tips. With IP Infusion & Ufi Space we have ventured into the disaggregated

open networking space. We bring to the table the transport portfolio including the core, data aggregation and DWDM transport technologies.

IP Infusion manufactures open network software and solutions for carriers, service providers and data centers. With hundreds of customers and thousands of deployments, IP Infusion is a market leader in Network Operating Systems. Our flagship software platform OcNOS® allows network operators to disaggregate their networks, streamline operations, and reduce Total Cost of Ownership (TCO). Network OEMs may also disaggregate network devices to expedite time to market, offer comprehensive services, and achieve carrier-grade robustness.

IP Infusion is headquartered in Santa Clara, Calif., and is a wholly owned and independently operated subsidiary of ACCESS CO., LTD.

Ufi Space offers comprehensive 5G solutions for communication service providers, cloud, and data centers. Our dedication to service and engineering drives 5G innovation. We're known for ground breaking products like S9500-30XS, the first live deployment of white box cell site gateway routers, and S9700 Series, the world's first Distributed Disaggregated Chassis Routing System. Furthermore, to embody our dedication to accelerating growth and industry transformation, Ufi Space plays an active role within open networking groups such as Open Compute Project (OCP) and Telecom Infra Project (TIP), contributing our product designs to the open networking ecosystem.

### FO3: KEITH ELECTRONICS PVT. LTD.

Keith Electronics Pvt. Ltd., a stalwart in India's electronics industry, is making waves with its latest product launch. With over 40 years of industry experience, the company's commitment to innovation remains unwavering.

The spotlight shines on Fujikura's cutting-edge splicing machine models, the 33S and 43S, poised to replace older versions. These machines are packed with innovative features and state-of-the-art technology designed to elevate splicing performance to new heights. With a dedication to continuous improvement, Fujikura aims to provide Indian customers with tools that enhance fiber optic splicing operations, ensuring efficiency, precision, and reliability in the rapidly expanding telecommunications and optical fiber industry.

Additionally, Keith Electronics has expanded its product lineup to include the advanced OTDR AQ7280 series. With a larger display and improved dynamic range, this Optical Time Domain Reflectometer is highly adaptable. It supports various fiber optic network applications, such as long haul, metro, core, and FTTH. This product launch underscores Keith Electronics' commitment to staying at the forefront of technological advancements in the industry.

As India introduces 5G technology, Keith Electronics anticipates a surge in IoT and enterprise use cases. The company is well-prepared to meet these demands with its cutting-edge splicing

equipment and application-specific OTDRs. These innovative products showcase Keith Electronics' dedication to providing state-of-the-art solutions for evolving industry needs.

In conclusion, Keith Electronics Pvt Ltd continues to lead the way in India's electronics industry with its commitment to innovation and excellence. The launch of the Fujikura 33S and 43S splicing machines, alongside the advanced OTDR AQ7280, demonstrates the company's readiness to embrace the future of telecommunications and optical fiber technology, offering customers the tools they need to excel in this rapidly evolving landscape.

### F05: AD SG TECHNOLOGIES PVT. LTD.

#### Welcome to SG Beldon: Your Fiber Optic Solutions Partner

SG Beldon is your premier destination for cutting-edge fiber optic passive equipment. With an unwavering commitment to excellence and innovation, SG Beldon has earned a reputation as a top-tier provider of premium fiber optic solutions, catering to the diverse needs of businesses and organizations globally.

#### Fiber Optic Expertise

SG Beldon boasts a team of experts who are leaders in fiber optic technology. Our extensive product range includes fiber optic couplers, splitters, connectors, and more, meticulously designed to meet the rigorous demands of modern data transmission, telecommunications, and networking.

#### Quality Beyond Question

Quality is the cornerstone of SG Beldon's operations. We uphold rigorous quality control measures at every stage, from sourcing high-grade materials to comprehensive testing. Our steadfast commitment to quality ensures that our products consistently exceed industry standards, ensuring unparalleled reliability and durability.

#### Innovation That Drives Us

Innovation is at the heart of SG Beldon. We continually invest in research and development to stay at the forefront of technological advancements. Our catalog showcases the latest innovations, empowering our clients with the tools they need to excel in a dynamic and evolving landscape.

### Sustainability and Responsibility

Beyond delivering exceptional products, SG Beldon is committed to sustainability and ethical business practices. We actively take measures to reduce our environmental footprint and uphold our social responsibilities. When you choose SG Beldon, you're not just choosing a quality product; you're selecting a partner dedicated to responsible business.

Join us in the fiber optic revolution, where reliability, innovation, and excellence converge. Together, we'll build a faster, more connected future.

For inquiries, custom orders, or expert guidance, please contact our dedicated team. Thank you

### F14: BHARATH FIBER NETWORKS PVT. LTD.

In today's highly competitive world, ISP/LCO/MSO need to be in par with the technology, In today's world, the infinity option INTERNET needs a 24x7 uptime, hence the right device needs to be in place which can be configured/monitored/controlled too in order to bring safety to the

## FOCUS: SCAT 2023 SHOW GUIDE

customers data and also does meet the compliance of the government. unless you have a good team/visionaries in understanding the needs of the customers there is no way business will be able to sustain. Since India is now has the highest population of youngsters who want a choice to see what/when they want with a single billing option and the options available at the tip of their hands. Since most of the ISP/LCO/MSO never had this need coming up, their network nor their head end is ready to counter this ever hunger of the Internet or are they aware of how to do the transition.

With rich experience on the field BFNL has come up with a ALL IN ONCE SERVICE MODEL where in, it has tied up with the need of the hour companies which are able to provide any of the last mile services of IPTV/OTT/Android Box/Voice/Cloud/Billing/Network Monitoring/Managed Service/Ticketing.

We work with them through api's, integrate all the services as ONE SERVICE, so that the last mile providers do not have to break their head about integration/security/compliance etc, Instead they just can kick start the service immediately with minimalistic change in their network. Our 24x7 support team can monitor their devices including software. Last but not the least the cost of the devices are very competitive compared to any other devices/services in India

### G01: M-CORE INDUSTRIES PVT. LTD.

Established in the early 1990s by Mr. Rajinder Makhija, our group started with the production of Antenna Wires, Foam Co-Axial Cables, CCTV cables, and Gas-Injected Co-Axial Cables. In the early 2010s, we expanded our product line to include CAT-5 and CAT-6 Networking Cables to meet the growing demand for reliable data transmission solutions.

In 2018, we achieved a significant milestone by establishing a state-of-the-art Optical Fibre Cable Manufacturing plant in New Delhi, India. Today, we are a reputed manufacturer of Optical Fibre Cables, FRP Rods, and HDPE, with complete quality control over the raw materials and manufacturing process.

With decades of expertise and a commitment to quality, we offer affordable and reliable products. Our facilities in Delhi and Haryana have a combined annual capacity of over 250,000 kilometers of Cable production.

Manufactured under strict quality control and in accordance with international standards, our products are known for their reliability, performance, and aesthetic appeal. We are proud to be pioneers in the field of telecommunication, broadband, and CATV, thanks to our cutting-edge technology and user-friendly solutions.

### H01: FELDER BROADBAND SYSTEMS

Satellite Internet is a type of Internet access that uses satellites in space to provide broadband connectivity to remote areas where terrestrial Internet is not available or unreliable. Data is sent from the user's satellite dish to a satellite in space, then to a ground-based hub, which routes it to the Internet. This technology allows for high-speed Internet access even in remote locations, but it is generally more expensive and has higher latency compared to other forms of Internet access like cable or fiber.
